

# Z/38 CAMARO CONVERSIONS

BY Rad Air INC.

Conversions that put

## “REAL MUSCLE”

into the 2010 Camaro

Rad Air Z/38 Conversions will give your new Camaro that traditional muscle car look and a new standard of performance.

Rad Air will start with a factory Camaro and add to it a whole new level of quality and performance with custom upgrades such as:

- Interior upholstery
- Painted racing stripes and logos
- Two tone custom paint schemes
- *Special Edition* airbrush art
- Suspension upgrades
- Brake upgrades
- 475 to 800 hp engines
- Performance driveline upgrades
- Wide body modifications
- Racing hoods and spoilers
- Custom wheel packages

Rad Air removes the stick on racing stripes and adds custom painted stripes that are similar to vintage striping or a totally new paint and striping themes. Also aftermarket hoods, spoilers, and wide body conversions are available.

The “Special Edition” Camaro conversions feature airbrush Z-Rod logos on the hood or rear quarter panels on the exterior and a custom under hood mural featuring Z-Rod and a portrait of the particular Z/38 that is built.

Each conversion gets its own number displayed in a painted enlarged bowtie displayed on the trunk.

Interior enhancements are available from custom color seat inserts, color coordinated stitching, Z/38 headrest embroidery, Z-Rod logo embroidery, colored coordinated door and dash inserts, shifting boots in custom colors, and Steering wheel stitching/color enhancements.

*Rad Air* specializes in performance engine and drive train upgrades. **Z/38** engine upgrades are available from 475 to 800 HP in naturally and supercharged configurations.

Suspension and brake upgrades such as slotted "Frozen Rotors", 15" Brembo Brakes, Eibach springs, KW Coilovers, and adjustable torsion bars are typically part of the **Z/38** conversion.

Custom style wheel packages are available in stock and larger sizes.

## Complete Packages

All performance, paint and interior modifications are usually done as a custom package for our individual customers. However, *Rad Air* has put together some *balanced* preplanned packages for the buyers convenience. These packages are for the LS3 engine Camaros, but similar packages can be done with the Camaros that have L99 engines
